Hydro-Seeding Units

Landscape Series - HSR500

Like the stationary models, this trailer version is also used with natural mulch made with recycled newspaper. Mulch is applied simultaneously with seed and fertilizer for maximal germination, thus offering a more economical solution than sod.

Industrial Series - HS1000

Providing a covered area of 1200m², the HS1000 model will increase your efficiency for treatment of big surfaces.

There are many other sizes and options available on all the equipment above.
Please contact us with your specific needs.
